

1. The worksheet contains the following data:

1 / 1 бал

	A	B	C	D
1				
2		macquarie university		
3				
4				

What will the formula: **=TRIM(B2)** return?

- ☒ macquarie university
- ☐ macquarieuniversity
- ☐ Macquarie University
- ☐ macquarie university

✓ Правильно
Yes, that's correct.

2. The worksheet contains the following data:

1 / 1 бал

	A	B	C	D
1				
2		macquarie university		
3				
4				

What will the formula: **=LEN(TRIM(RIGHT(B2,11)))** return?

- ☐ university
- ☐ #VALUE!
- ☐ 11
- ☒ 10

✓ Правильно
Yes, that's correct.

3. What does the **CLEAN** function do?

1 / 1 бал

- ☐ The **CLEAN** function removes unnecessary spaces and some non-printable characters within a string.
- ☐ The **CLEAN** function cannot do anything on its own, without the use of the **TRIM** function as well.
- ☒ The **CLEAN** function removes some non-printable characters within a string.
- ☐ The **CLEAN** function removes unnecessary spaces within a string.

✓ Правильно
Yes, that's correct.

4. The worksheet contains the following data:

1 / 1 бал

	A	B	C	D
1				
2		macquarie university		
3				
4				

Which of the following formulas will return **QUA**?

- ☒ =MID(UPPER(B2),4,3)
- ☐ =UPPER(MID(B2),3,4)
- ☐ =UPPER(MID(B2,3,4))
- ☐ =MID(PROPER(B2,4,3))

✓ Правильно
Yes, that's correct.

5. The worksheet contains the following data:

1 / 1 бал

	A	B	C	D
1				
2		macquarie		
3		university		
4				

What will the formula: =**CONCATENATE**(**PROPER**(B2)," ",B3) return?

- ☐ Macquarie University
- ☒ Macquarie university
- ☐ MACQUARIE UNIVERSITY
- ☐ #VALUE!
