1. The cell **F2** contains the following formula: =**B2+C2+D2**. What would be the resulting formula in cell **F3**, if we drag the fill handle down?

     ⦿ =B3+C3+D3

     ◯ =B2+C2+D2

     ◯ =C3+D3+E3

     ◯ =C2+D2+E2

> ✓ Правильно
> Yes, that is correct.

2. The tax rate, **15%**, is in cell **G2**. Which of these cell references will allow us to use this value in a formula that appears down an entire column?

     ☑ G$2

> ✓ Правильно
> Yes, if you fix the row reference then you can copy it down a column without it changing.

     ☑ G2

> ✓ Правильно
> Yes, an absolute reference can be copied down a column without changing.

     ☐ $G2

     ☐ G2

3. Instead of using absolute cell referencing, another way to refer to a tax rate of **15%** which is cell **G2**, would be to:

○ Click in the **Name Box**, create a new name, and then click on cell **G2**.

○ Click on cell **G2,** and then edit its name in the **Name Range** to create a **Named Box.**

○ Click in the **Name Box**, then click in cell **G2**, then type in a name.

⦿ Click on cell **G2**, and then edit its name in the **Name Box** to create a **Named Range.**

✓ Правильно
    Yes, that is correct.

4. Zara wants to create a name for the range for the tax rate of **15%**. She types in **Tax15**, what is the problem?

○ An underscore must separate letters from numbers.

○ Tax15 is a mix of letters and numbers which is not permissible for names.

⦿ Tax15 is a cell reference.

○ Tax15 is a heading in the document so it cannot be used as a name.

✓ Правильно
    Yes, that is correct.
